Designern, Möbeln und
Ausblicken, die
unvergesslich bleiben

Transferleistung:
Das Elektroboot teilt seinen voll-elektrischen Antrieb mit dem des Porsche Macan Turbo.

Frauscher x Porsche 850 Fantom Air

Das Sportboot Frauscher x Porsche 850 Fantom ist ein eleganter Daycruiser mit vollelektrischem Antrieb aus dem Porsche Macan. Porsche nutzt für den Technologietransfer von der Straße aufs Wasser die stärkste Variante des vollelektrischen SUV – den Hinterachsmotor des Macan Turbo. Frauscher bietet das Boot als klassisches Runabout und Air an, also mit geschlossenem Vordeck und Kajüte unterm Vorschiff oder einem Mittelsteuerstand mit Sitz- und Liegegelegenheiten auch am Bug. Beim Interieur ließen sich die Porsche-Designer auch vom 911 inspirieren – so bilden fünf klassische Rundinstrumente das Zentrum der Armaturentafel. Die 850 Fantom Air bietet Platz für bis zu sieben Passagiere und die 25 Exemplare der limitierten First Edition zum Preis von knapp 700 000 Euro werden ab 2026 ausgeliefert.

Formensprache:
Das Design und die Farbgebung der Motoryacht lehnen sich an das Sondermodell Fenomeno an.

Tecnomar for Lamborghini 101FT

Die Motoryacht Tecnomar for Lamborghini 101FT ist ein amphibisches Hypercar. Ihr Design mutet wie eine maritime Übersetzung des Supersportwagens Fenomeno an: kantige Konturen, scharf gefasste Lichtsignaturen und pure Performance dank dreier 16V-Turbodiesel und 7600 PS Gesamtleistung. Mit bis zu 45 Knoten (rund 83 Stundenkilometern) gleitet die Tecnomar über das Wasser. Auch ihre Farbgebung lehnt sich an die Lackierung „Giallo Crius“ des Fenomeno an. Ebenfalls im Lamborghini-Stil präsentiert sich die Innenausstattung, die auf typische Designelemente wie Sechsecke und Y-Formen setzt. Bei der Instrumentierung im Cockpit sind Anleihen an den Temerario von 2024 auszumachen. Die Yacht bietet Platz für bis zu neun Gäste und verfügt über drei Crew-Kabinen. Ende 2027 soll die Tecnomar in See stechen. Der Schätzpreis: über 10 Millionen Euro.

AUTOMOBILI LAMBORGHINI AND THE ITALIAN SEA GROUP PRESENT

THE LAMBORGHINI 101FT MOTORYACHT

At the Monaco Yacht Show, Automobili Lamborghini and The Italian Sea Group presented the worldwide premiere of the new Tecnomar for Lamborghini 101FT. The collaboration between the two companies began in 2020 with the launch of the Tecnomar for Lamborghini 63, which paid tribute to the year the House of Sant'Agata was founded and was a huge success among enthusiasts.

The new 101FT, named for its length of about 30 meters, embodies the synthesis between two companies that are worthy of representing Made in Italy excellence on the global level. Distinguished by high technological and design value, the project was conceived with the aim of creating an unrepeatable experience for those who drive the motoryacht, just as it is for Lamborghini customers.

The model stems from the synergy between the two brands, combining the technical and engineering excellence of The Italian Sea Group with the distinctive aesthetics and innovation typical of Lamborghini's super sports cars.

Stephan Winkelmann, Chairman and CEO of Automobili Lamborghini, comments: "With the Tecnomar for Lamborghini 101FT, we are taking Lamborghini's DNA to sea: performance, design, and innovation come together in a motoryacht that redefines the concept of nautical luxury.

It is not only a yacht, but an affirmation of Italian excellence. The Italian Sea Group and Automobili Lamborghini share an exclusive clientele, who are passionate about beauty, technology, and extreme performance. It is exactly this shared vision that makes our collaboration so natural and so significant."

In fact, luxury, design, and innovation are the keywords that define this prestigious yacht that exalts the excellence of Italian industry. The Tecnomar for Lamborghini 101FT features some of the most appreciated iconic elements of Lamborghini design and lines. Starting from the exteriors, inspired by the new few-off Fenomeno1 – produced in a limited edition of just 29 cars – presented in a worldwide premiere in August at Monterey Car Week. In addition to the color – the Giallo Crius used for the launch livery –, other elements inspired by the Fenomeno include the front and rear lights, which take a cue from those used on the car from Sant'Agata Bolognese. But it is the whole of the exterior lines that possess the unmistakable, iconic and essential hallmark of the brand, where every detail combines the maximum functionality with the utmost aesthetic purity.

The yacht's helm station also clearly draws inspiration from the cars of Sant'Agata Bolognese, particularly the Temerario2, Lamborghini's "fuoriclasse" hybrid V8 HPEV. This means that being at the helm of the 101FT gives the same feeling as being behind the wheel of a Lamborghini super sports car.

The interiors have an affinity with those of the models of the House of Sant'Agata Bolognese in terms of colors, stitching, and forms. In fact, the iconic Lamborghini elements onboard include hexagons, clean lines, and the "Y"-shape. The yacht can accommodate up to nine guests and has three crew cabins, ensuring spacious and comfortable environments that make even the longest journeys pleasant.

Mitja Borkert, Design Director of Automobili Lamborghini, remarked: "With the new **Tecnomar** for Lamborghini 101FT motoryacht, we aimed to create a product that embodies the main design characteristics of our super sports cars. All the details, from the exterior to the color, to the interior areas, recall and are inspired by Lamborghini's DNA. Our Centro Stile, in operation for twenty years at Lamborghini's historical headquarters in Sant'Agata Bolognese, worked with care to ensure that every element was studied in meticulous detail and reflected the brand's unmistakable design."

From the technical perspective, the 101FT is equipped with three powerful MTU 16V 2000 M96L engines, combined with three surface propellers, which make it possible to reach a top speed of 45 knots and a cruising speed of 35 knots. These performance figures are supported by a total output of 7.600 horsepower and two 35 kW generators, ensuring efficiency and reliability in every condition.

The **Tecnomar** for Lamborghini 101FT was presented in a scale version in an exclusive premiere during the press conference at the Monaco Yacht Show, the most prestigious showcase of the international nautical panorama. The definitive model will set sail at the end of the 2027.
